Subject: Documentation of Inter-Basin Transfer
Huntsville Utility District
Scott County

Gentlemen:

In accordance with the law, Chapter Number 854 of Public Acts 2000, we hereby offer the following documentation for your review.

Originating Watershed: The Upper Cumberland River Basin

Receiving Watershed: The Upper Tennessee River Basin

Amount of Transfer: 47,798 Gallons Per Day

This transfer occurs when we provide water on a wholesale basis to Plateau Utility District. Our highest continuous 90-day period (as recorded at the Master Meter) between September 2012 and August 2013 occurred during the months of June 2013, July 2013, and August 2013. The Master Meter readings for those three months were: 2,898,500 gallons, 2,599,200 gallons, and 3,106,000 gallons, for a total of 8,603,700 gallons for 90 days or 95,596 gallons per day. The Plateau Utility District has informed us that approximately 50% of their distribution system lies north of the Tennessee River divide. Thus approximately one-half of the daily flow (47,798 gallons) is assumed to be transferred.

Sincerely,

Kares Hamby, Plant Operator
Huntsville Utility District
